

Active Directory Group Policy

Programming/Registry

Reference

Group Policy Program/Registry Reference for Administrative Templates

All policies are listed alphabetically by: policy node, policy path, symbolic policy name and policy name.

For policy node:

- Computer Configuration / Administrative Templates policies are listed under COMPUTER.
- User Configuration / Administrative Templates policies are listed under USER.

For example, if you wanted to find the computer configuration policies for Administrative Templates\Component Updates, you would look under COMPUTER, Administrative Templates\Component Updates.

The symbolic policy name is the name you would use when scripting or programming Group Policy, such as with Windows Management Instrumentation (WMI).
